Degree:

Module: Specialization: Advanced

Experimental Physics

Module No.: physics62a

Course: universitätbonn

Photonic Devices

Course No.: physics640

Category	Туре	Language	Teaching hours	СР	Semester
Elective	Lecture with exercises	English	3+1	6	ST

Requirements for Participation:

Preparation:

Form of Testing and Examination:

Requirements for the examination (written or oral): successful work within the exercises

Length of Course:

1 semester

Aims of the Course:

To make the students understand physical and technological foundations of photonics and enable them to practically apply their knowledge in research and development.

Contents of the Course:

Optics: Rays, Beams, Waves; Fourieroptics; Light sources; Detectors; Imaging devices Waveguides, Fibers; Photonic Crystals; Metamaterials;

Optical amplification; Acoustooptics, electrooptics;

Photonic circuits, optical communication

Applications

Recommended Literature:

D. Meschede; Optik, Licht und Laser (Teubner, Wiesbaden 2. überarb. Aufl. 2005)

A. Yariv; Photonics: Optical Electronics in Modern Communications (Oxford Univ. Press 6th edition 2006)

B. Saleh, M. Teich; Fundamentals of Photonics (John Wiley & Sons, New York, 1991)

C. Yeh; Applied Photonics (Academic Press, 1994)

R. Menzel; Photonics (Springer, Berlin 2001)
